As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowlndge in web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 07.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website Wilson Sporting Goods is a store about Wilson Sporting Goods that helps us find and buy products easily and appropriately.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@apttech.ac.in*** as the assigned schedule.

Problem Definition

I.

Problem Statement

WILSON SPORTING GOODS is selling various types of Sports Goods. The company advertises by distributing the pamphlets, advertising on television and so on. Due to rapid development in internet field, the company decides to launch a website where people will get all the information about the various products available with them easily.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Requirement Specification

The Web site is to be created based on the following requirements.

1. The Home Page should be created making use of Frames with a suitable logo.
2. Home Page should contain details of Sports Goods with suitable images.
3. The site should display a menu which will contain the options for brief introduction about the various sporting goods available, location of the shop and any other information if required.
4. The information should be categorized according to the brand names of the products like if a User wants to see only “REEBOK” products or any other companies products then he/she can click on a Link/button/menu etc and can see only that Brand products.
5. When a user selects any particular brand, a list of products for that brand will be displayed
6. A brief summary of features of individual products should be displayed on the Web Page along with the product but detailed Features should be stored in Individual

Word documents which can be downloaded or viewed by the User who wishes to see the same.

7. The user should also be able to compare the various products of different as well as similar brands.

8. There should be a “Contact Us” page which will have the Address of the Company which should be displayed using GeoLocation API (eg. GoogleMaps) and the email address which when clicked will invoke the local mail client from where they can send an email.

II.

Nowadays sport is a necessary thing in our life, contributing to improve the quality of physical health of each person, besides there are many sports that need necessary items to participate in such as tennis, baseball or basketball... Following this bridge, we plan to open a store to provide people with the sporting goods they need so that they can play the sport they love

III.

➤ In this shop we:

- Provide the information and the quality of each goods for user quickly
- Put a reasonable price for each goods
- Every product has a warranty period so that users can return or exchange it if there is something wrong with the product.
- Receive customer feedback on service quality and respond to messages from staff
- Receive customer feedback about the product

➤ And user can:

- Find information and quality of goods that love with a suitable price
- Register as a regular customer of our shop
- Suggestions to management about product quality or other issues

Customer Requirements Specifications

User:

Input:

- Enter customer registration data
- Goods information to look for
- Give feedbacks store owner

Process:

- Check customer registration information
- Find information about the goods
- Check the feedbacks information

Output:

- Customer registration success or failed
- Information about selected goods
- Feedbacks information success or failed

Webmaster:

Input:

- Information about price or quality of goods that need to be added, corrected or deleted
- Data sheet for customer registration
- Respond to customer comments

Process:

- Added, corrected or delete the price or quality of goods
- Check member registration information
- Check the feedbacks customer comments

Output:

- Added, corrected or delete the price or quality of goods successfully or failure
- Notification of success or failed registration to customers
- Notification of success or failure of feedbacks
